

FOR IMMEDIATE RELEASE

APOLLO ENTERPRISE SOLUTIONS, LTD. (“AES”) LISTED ON THE BERMUDA STOCK EXCHANGE

Long Beach, CA, November 8, 2012 – AES, a leading provider of advanced interactive software solutions for banking transactions, announces today its new listing on the Bermuda Stock Exchange (“BSX”). AES’ Chairman & CEO, Joseph Konowiecki, will be at the BSX for its opening on November 9, 2012. AES will trade under the symbol AES:BH on the Bermuda Stock Exchange and AESL:SIX on the Swiss Stock Exchange.

AES is listing on the BSX as a Bermuda holding company, since AES is a financial services company and many insurance and financial services companies are domiciled in Bermuda. The company also intends to be dual-listed on the SIX Swiss Exchange and its European headquarters will be in Switzerland. AES plans an institutional European roadshow organized by Continental Advisors (Lux) during the month of November.

The AES TRUE™ suite of proprietary software programs provide “TRUE™ Sustainable Solutions for Consumer Credit Portfolios” and integrate with the entire lifecycle of a bank’s consumer loan portfolio and its business rules on a real-time automated basis. AES’ intelligent decision engine utilizes Choice Technology™ to present consumers individualized targeted solutions in meeting their payment obligations. This TRUE™ system not only adds margin to the lending institution’s credit portfolio, but also provides better customer experience and enhances the brand of the bank.

“AES continues to enhance its software, expand its patent portfolio, and maintain client and partner relationships across the globe,” said Mr. Konowiecki. “AES is prepared for its next phase of evolution in the United States, Europe, and international markets beginning with its listing on the BSX.”

About AES

Apollo Enterprise Solutions, Ltd. (“AES”), with offices in Los Angeles, New York, London, Sydney, and Lugano is home of the patented TRUE™ system, the first total self-service account management system for banks and other financial enterprises. This system broadens the scope of existing online banking systems by enabling consumers to obtain more complex banking and other financial services on a convenient self-serve basis. The TRUE™ system increases collections and recoveries; reduces charge-offs; rapidly activates business rule and other change management initiatives; enhances the customer experience; and reduces operating costs, account attrition rates and roll rates. The TRUE™ system’s modules are highly secure, hosted Software-as-a-Service and Private Cloud applications that integrate into IBM, Oracle, Microsoft and other operating environments, and into a wide range of collections systems of record.
